

CIRRUS BUSINESS SOLUTIONS JOINS FORCES WITH THE SESF

February, 2023: The Sports Excellence Scholarship Fund are excited to announce a new partnership with Cirrus Business Solutions for 2023.

Through the financial support of Cirrus Business Solutions, the SESF will award multiple scholarships to deserving athletes who are chosen to represent their state or country at national and international competitions.

The scholarships will be awarded to students across Australia from low socioeconomic backgrounds who otherwise would struggle to meet the financial requirements associated with attending national or international competitions.

Cirrus Business Solutions was founded to provide solutions to businesses faced with growing compliance, statutory and governance requirements across their financial, commercial and HR functions. Cirrus Business Solutions is a registered BAS Agency servicing a broad range of clients across various industry sectors, in an increasing complex environment. The company also strives to give back to the community often through strategic partnerships with foundations and charities.

Through their partnership with the SESF, Cirrus Business Solutions will support the SESF and increase their capacity to deliver scholarships. 2022 marked the inaugural year of the SESF as a national charity, with 145 scholarships distributed to 6 states across the country.

As the foundation continues to expand in 2023, the demand for scholarships is expected to drastically increase. In 2022, applications for scholarships greatly outweighed the number available by over 370 per cent.

Partnerships are key to ensuring the SESF can reach more deserving athletes in 2023 through providing scholarships to meet an expected increase in demand. Therefore, the foundation is actively searching for future partners to support its work.

Netasha Gooding, Director Cirrus Business Solutions said, "Everyone at Cirrus is thrilled to begin this significant partnership with the SESF and support deserving athletes in 2023".

"The work the foundation does to provide opportunities to young people is outstanding and we're excited to be able to support the next generation of athletes through this partnership".

Nick Mooney, SESF Executive Director said, "We are excited to partner with the team from Cirrus Business Solutions to help continue our work and reach more athletes in 2023".

"Our first year as a national charity was a significant success, but we have also identified an extensive further need for scholarships within the community, with this partnership allowing us to extend our reach."
